Last Updated Wednesday, 31 May 2006

There will be a short downtime tomorrow, Sunday 28th of May 2006. I will run some small update of our User Management ("Community Builder"), and the site will be offline during that time. This will probably happen at around 18:00 GMT, which means about morning / noon in America.

The update was applied successfully! If you notice anything strange, use the Discussion thread below:
